A Guide to
Worksite Fire Safety

Help prevent fires at your worksite by following these guidelines:

ALWAYS...

• Keep equipment and machinery clean and in good operating condition.

• Make sure that all electrical equipment is protected.

• Store flammable or combustible materials in the right containers, away from heat sources.
• **Keep work areas clean and free of debris.**

• Dispose of flammables according to established safety guidelines.

• Use caution when operating welding and other spark–producing equipment.

• Clean or report all spills.

• **Report suspicious people to security or the plant manager.**

• Keep fire exits and escape routes clear and well marked.
• Know where alarm boxes are located.

NEVER...

• Never leave open flames unattended.

• Never overload circuits.

• Never take shortcuts with safety procedures.

• **Never smoke or use flame or sparks in an area where flammables are present.**
